Inkberry Holly Collection

'Compacta'- Dense, evergreen shrub with dark green leaves, may become leggy at its base. IT'S lustrous leaves are 1-2" long, turning plum-purple in winter. Females produce small black berries in fall.

'Densa'- Oval-rounded shrub with upright branches covered with leathery, dark green leaves. Dark, berry-like fruit is produced fall through spring. Ideal for foundation, hedge, accent planting.

'Shamrock' -Selected for its compact habit and bright, glistering new foliage, this dwarf grower makes an excellent hedge or border plant. The dense twiggy habit displays an abundance of black berries through winter. Deer resistant.
